

This document outlines general use and acceptable use for any Atomic Systems supplied Internet services.

Acceptable Use Policy

- To ensure the availability of our Services to eligible customers, we have an Acceptable Use Policy to make sure everyone gets a fair go.

Unreasonable Use

You, and any person who accesses your Service, must not use, or attempt to use, the Service:

- For resale of services without our prior consent or knowledge
- for illegal purposes or practices
- for any purpose if we advised you that such purpose was prohibited in your Application or the relevant Service Description
- in any way which damages or interferes (or threatens to damage or interfere) with the operation of a Service or with the efficiency of our Network or a Supplier's Network (including as a result of attempts by you to increase the capacity or performance of your system or Your Equipment);
- in any way which makes it unsafe or which may damage any property or injure or kill any person
- to transmit, publish or communicate any material or engage in any conduct which is defamatory, abusive, menacing or harassing
- to engage in abusive behavior toward our staff
- to make inappropriate contact with children or minors
- to access, store, reproduce, distribute, publish or commercially exploit any information or material of any kind that infringes any copyright, patent, trademark, design or other intellectual property right
- to send, relay or distribute any electronic data, the contents or properties of which have been manipulated for the purpose of maliciously or illegally impersonating or obscuring the original source of that data. This does not include the use of Virtual Private Networks or similar concepts in circumstances where this is legal and otherwise complies with this Policy
- to access, monitor, use or control any other person's equipment, systems, networks or data (including usernames and passwords) or to otherwise probe, scan or test the vulnerability of any other person's equipment, networks, systems or data, without that person's consent;

- to access, or attempt to access, the accounts or private information of others, or to penetrate, or attempt to penetrate, our or a third party's security measures, computer software or hardware, electronic communications system or telecommunications system, whether or not the intrusion results in the corruption or loss of data. This does not include conducting network security testing specifically requested by the owner of the targeted network or system
- to use or distribute software (such as password guessing programs, keyboard loggers, viruses or trojans) with the intent of compromising the security of any network or system
- to make fraudulent offers to sell or buy products, items, or services or to advance any type of financial scam such as 'pyramid schemes', 'Ponzi schemes', and 'chain letters'
- to engage in any unreasonable activity which impairs the ability of other people or systems to use our Services or the Internet. This includes any malicious activity resulting in an adverse effect such as denial of service attacks against another network host or individual user, flooding of a network, overloading a service, improper seizing or abuse of operator privileges, and attempts to harm a system or network. For the avoidance of doubt, this clause does not capture an activity solely because it unintentionally contributes to network congestion; or
- to access, store, reproduce, distribute or publish any content which is prohibited or unlawful under any Commonwealth, State or Territory classification system, or to provide unrestricted access to material that is unsuitable for minors.

Our Rights

- If We reasonably consider Your use of the Fair Use Services is unreasonable, We may, at Our sole discretion, without telling You before We do so:
 - suspend or limit the Service (or any feature of it) in accordance with Our Agreement with You; and/or
 - terminate the Service in accordance with Our Agreement with You.
- This policy is supplementary to and does not limit any of Atomic System's rights.
